PROJECTS

Magnet

Social Media Platform

Github: <https://github.com/khalasismit/ProjectMagnet>

Developed a full-stack social media web application with functionalities like post , like, comment, chat, Save.
While Building the project i learned about google authentication and Firebase ,Git, JWT,Material UI.

Tweetverse

Github: <https://github.com/khalasismit/tweetverse>

This project is structured into modular components for user interface, API logic, and administrative functionalities.
Implemented core features including user registration, authentication, post creation, and real-time feed display. Followed RESTful API design principles to handle user data and tweet interactions efficiently.
